The 2nd Asia, Middle East and Africa (AMEA) Bitumen Conference which is themed **“Connecting the Dots of an Evolving Global Bitumen Market”** will be jointly organized by Petrosil’s Bitumart and Rex Fuels in Mumbai, India on August 1-2, 2018.

Co-Located Side By Side Global Bitumen and Base Oil Conferences In India For The First Time!

Meet The Largest Bitumen Buyers and Sellers from Asia and the Middle East in One Place!

As the region undergoes tremendous changes and is expected to attract energy companies of all sizes from the largest global players to the smaller traders, AMEA bitumen hopes to tie in the perceived supply and demand challenges and connect the dots of the bitumen industry in the region.

The 1st Asia, Middle East and Africa (AMEA) Bitumen Conference was jointly organized by Petrosil and Rex Fuels on July 12-13, 2017 in Mumbai, India. The conference attracted more than 200 senior bitumen decision makers from more than 20 countries in the region.

The AMEA Bitumen Conference will provide a comprehensive overview of the region's bitumen market including the latest trends, drivers, competitive landscape, logistics updates, technology developments, demand and supply information and will offer delegates the opportunity to network with leading industry experts, exchange information and have access to premium presentations.

The Indian sub-continent is strategically placed geographically and has the advantageous position in terms of proximity to these important locations and will provide delegates in the bitumen industry with the platform and resources to turn challenges into opportunities in the region.

Asian countries like China, India, Singapore, South Korea, Thailand, Malaysia, Indonesia, Vietnam, Japan and other countries have one of the fastest growing and dynamic bitumen markets, while the Middle East is becoming a regional hub for good quality bitumen supplies and Africa is evolving and emerging into a prominent bitumen market offering tremendous opportunities to bitumen refiners, suppliers and regional road construction companies.

With significant trade, road construction, capacity increases, technological changes and product innovations taking place in the region, this market is poised to play a key role in shaping the future of the global bitumen market.

The conference has been priced competitively to encourage greater industry participation so that there is a greater opportunity to network with a larger number of bitumen suppliers and genuine buyers and end users.

“

The conference aims to bring together leading industry players from the world’s fastest growing bitumen markets in the region.

”

Who Should Attend?

Any entity directly or indirectly connected to the global Base Oil, Lubricant and Wax industry will benefit from attending the 1st BLW Conference. Refiners, Producers, Exporters, Importers, Buyers, Additive Companies, Logistics Companies, Consultants, Shipping Companies, Storage Companies, Transporters, Packaging Companies, Plant and Equipment Manufacturers, Specialty Oil producers and suppliers, Customs Departments, Government Agencies, Institutions etc will find great value in attending the conference.
